Areas of expertise

Calum has over 10 years' experience working in the environmental consultancy field, and prior to moving to the United Kingdom, worked as an Environmental Officer within the Construction Sector and EIA Consultant in South Africa.

Recent UK projects include mixed-use residential and employment schemes on greenfield sites within Cherwell District Council, the Vale of White Horse District Council and Aylesbury Vale District Council and large-scale urban regeneration projects within the London Borough of Hammersmith and Fulham, Wandsworth, Haringey and Barnet. Deliverables for these projects included Scoping Reports, Environmental Statements/Environmental Impact Assessments and Construction Environmental Management Plans.

Calum has extensive experience in monitoring and auditing construction related impacts on the environment, ranging from small residential to major infrastructure developments, including roads, bridges, pipelines, airports and electrical powerlines. He has conducted EIAs for some of South Africa's largest parastatals including Eskom and Sasol Gas Ltd, and within the private sector has worked on a variety of projects including residential, retail, leisure and commercial.

As a result of his time in the Construction Sector, Calum has a keen interest in coordinating and discharging environmental planning conditions and developing Construction Environmental Management Plans.
