

A Quod profile

Ben Jacob

Assistant Consultant

BA (Geography) LSE

Ben.jacob@quod.com

Areas of expertise

Ben is an Assistant Consultant at Quod and has a particular interest in the delivery of green energy and transport developments. He recently graduated from university, where he completed his dissertation researching the impact of proximity to a nuclear power plant on residential property prices.

He has experience in conducting baseline data analysis, policy research and the use of GIS and enjoys making the case for developments via visually engaging maps and figures. He has so far been engaged in the delivery of projects in Finchley, Elephant & Castle and Oxford and is eager to expand his experience in producing a range of planning application reports.

Key experience

Ben's experience includes the delivery of mixed-use, commercial and R&D focused developments.

North Finchley Town Centre – Ben carried out baseline analysis of the area impacted by the mixed-use development in North London and was involved in the production of maps using QGIS and drafting of an Economic Statement and Health Impact Assessment.

Elephant & Castle Railway Arches – Ben carried out an Equalities Impact Assessment for the redevelopment of a series of railway arches, considering how the plans might impact minority communities in the vicinity of the scheme.

Botley Road – Ben carried out baseline analysis of Oxford and its surrounds, evaluating the economic and health impacts of a proposed life-sciences R&D facility and making the case for the development in the context of regional and national strategic objectives.
