

Tiffany Ho

Assistant Planner

BSc (Hons) Urban Planning, Design & Management
MSc (Hons) Housing & City Planning

tiffany.ho@quod.com

Areas of expertise

Tiffany joined Quod in November 2024 as an Assistant Planner after completing an MSc in Housing and City Planning at University College London. She has been involved in a range of infrastructure projects at Quod, including DCO applications, battery storage facility applications, and appeals.

Key experience

Stonestreet Green Solar Project DCO (Evolution Power Limited) - Tiffany is involved in the examination stage of the DCO application for the Stonestreet Green Solar Farm. She assists with drafting the responses to Relevant Representations and the Statement of Commonality. She supports the preparation of various examination materials to ensure the timely delivery of planning outputs.

Warren Lane, Bramham Battery Storage Facility (Harmony BH Limited) - The Warren Lane project aims to generate 35MW of renewable electricity on a 2.84ha site. Following the submission of the appeals, Tiffany is conducting background research that will be used to inform the planning strategy for the inquiry.

Wandon End Solar Farm (Evolution Power Limited) - The Wandon End Project will generate up to 49.9MW of renewable electricity on a 106ha site. Tiffany was involved in the submission and project management of inquiry and is currently assisting team in providing planning advice on various matters in relation to the project.
